

Smart AI Code Reviewer

Deployment Guide & Access Information

Application Successfully Deployed!

Live Application URL:

<https://8ftqsyucec.execute-api.us-east-1.amazonaws.com/>

Click the URL above to access your Smart AI Code Reviewer running on AWS Lambda.

Features & Capabilities

Code Analysis:

- Paste Python code for automated AI-powered review
- Static AST-based code metrics and analysis
- Custom review guidelines

Metrics Dashboard:

- Total Lines of Code
- Number of Functions & Classes
- Code Complexity (Decision Points)
- Missing Docstrings
- Global State Analysis

AI-Powered Review Sections:

1. Executive Summary - General code quality rating
2. Readability & Styling - Naming, style, comments
3. Design & Structure - Architecture, modularity
4. Maintainability & Bugs - Error handling, edge cases
5. Actionable Recommendations - Refactoring steps

Technical Specifications

Platform: AWS Lambda (Serverless)

Runtime: Python 3.11

Frontend: HTML5 with GitHub-inspired Dark Theme

API: RESTful with AWS Lambda Function URL

Region: us-east-1

AI Engine: Google Gemini API

Repository: <https://github.com/ashisht1/smart-ai-code-reviewer>

GitHub Actions: <https://github.com/ashisht1/smart-ai-code-reviewer/actions>
